Providing protection & peace of mind

Whether you own a cafe, parking station, pharmacy or any boutique business, the OP-DLC4 from Bosch will be there watching your investment. This high performance economical digital recording system is especially designed to meet the needs of retail organisations. It provides continuous recording of up to 4 cameras, so you can watch every corner, hallway, door or aisle while you are on site. The OP-DLC4 also allows for remote viewing of images over the Internet, so you can keep an eye on things even when you're not at work.

Simple Installation Complemented by Easy Operation

The OP-DLC4 has been designed with quick installation in mind to get you up and running fast. Simple operation means users can be confident that all activities will be detected and recorded. With the OP-DLC4 working alongside you - always watching, detecting and recording all activity as it happens, you will find it a great tool for reducing stock shrinkage, which will save you money in the long run!

Continuous Video Recording with Triplex Operation

Round-the-clock video recording on the OP-DLC4 allows you to see everything! By using Triplex operation, you can record, playback and remotely access video feeds all at the same time!

Crisp Images at a Fast Pace!

Utilising sharp M-JPEG video compression, the OP-DLC4 ensures your images are crisp, and at a rate of 100 images per second - you really won't miss a thing!

User-Friendly Searching and Simplified Back-Ups

The easy-to-use search bar allows you to search by date and time, and once you have found what you are looking for, simply back up your data via a standard USB stick.

Accessible from Anywhere

The OP-DLC4 provides you with complete flexibility allowing you to access your data remotely via a LAN or Internet connection.

Free Space with Added Convenience

For environments lacking space, the OP-DLC4 is ideal as it combines the recording unit with a 15" LCD monitor. It also saves on space because it is wall mountable. With the added convenience of a remote control, you can use the OP-DLC4 just like your television for constant surveillance at your fingertips.
