

BOSCH

Invented for life

Bosch Security now offers easy finance on its great range of security and communications products. Through finance provided by Alliance e-finance it is now even easier to choose Bosch. Consider the many benefits of rental when acquiring your new Bosch Security & Communications products...

Benefits of Rental

Flexibility

Rental gives you the opportunity to upgrade to or change your equipment as and when needed during the period of the agreement (some conditions apply). You can even dispose of the equipment during the agreement should you need to through a simple Variation of Rental.*

Future Proofing

Rental guards your installation against being saddled with technologically obsolete equipment. Either during the term of the agreement or at expiration, you can hand back your equipment and upgrade to the latest in Bosch technologies.*

No Capital Outlay

The finance option requires no initial capital expenditure. Finance options require only a monthly outlay rather than a major dollar outlay.

Tax & Cashflow Benefits

Under Rental or Lease, the monthly instalments normally qualify as a 100% tax deduction. Structured payments can be arranged to suit your cashflow either monthly, quarterly, half yearly or annually.

Accounting Benefits

The budgeting process is simplified without the need for extensive Capital Expenditure approvals as financing guarantees a fixed payment for a specified term.
