

BOSCH

Invented for life

DiBos

Course Outline

When you have completed this training, you will be able to:

- Describe the DiBos Digital Video Recorder and its functions.
- Setup the DiBos using the Configuration Wizard.
- Connect Analogue & IP Cameras, PTZ Cameras.
- Given system specifications, use the system Configuration to configure:
 - Hard Disk Drives to use
 - Video and Audio Connections
 - Define Recording Settings and Time Periods
 - Program Inputs, Outputs and Alarms
 - Remote Stations and Alarm Transmission
 - Users and Authorisation Levels and their permissions
 - Error Forwarding, Security and Network Settings

Prerequisites

The technical training is designed specifically for system installers - the skilled people who will be responsible for configuring the system to pre-defined customer specifications. It is a hands-on course. You will share a system with another student, and with your training partner you will spend most of your time configuring that system. A working knowledge of the CCTV industry including camera installation, digital and analogue CCTV basics and networking is preferred.

- You must be familiar with CCTV hardware/equipment.
- You must be familiar with basic network terminology and concepts.

Classroom Requirements for Students

- The only things you need to bring for the course are;
 - USB Memory Stick
 - Pen and Paper for your own notes.
