## The Bosch Mobile Showroom

Taking product demonstrations to the next level

Bosch can now take a working product demonstration featuring Intrusion, and PA Systems, with CCTV and Access Control integrated via video management software to a convenient location near you.

**BOSCH**  
Invented for life

# Take your demonstration to **the next level...**

We have listened to those customers who find it difficult to visit a Bosch office, and those who are some distance from our office locations. Now we are taking a **working product demonstration** where you want it to be!

Our specially fitted van has been created to provide a convenient way to meet your needs. We can now bring the working products to you, your staff and your customers.

We can also arrange with you for your clients to be shown the product they are considering in a real working scenario.

Being able to explain and visually demonstrate the benefits of the products using the mobile showroom means the customer can be confident the product meets their requirements.

Equipped with air-conditioning and lounge seating, Bosch welcomes you to experience our products in comfort and style.

Contact your Sales representative to find out when the Bosch Mobile Showroom will be in your area next!

**Dinion 2X Fixed Body Camera**  
**VIP-XD (Decoder)**

**Videojet X40 Encoder**

## A revolutionary concept in security product demonstrations...
