

X-DRIVEN

The ultimate **driving recording system** for your vehicle

BOSCH

Invented for life

The **essential** driving management tool for protection and peace of mind

The X-DRIVEN is a compact, aesthetically designed, high-resolution video camera with in-built microphone, GPS location data logger and G-force shock sensor that attaches easily to the windscreen of a motor vehicle.

The wide fisheye (150° Horizontal) angle Lens offers optimum visibility across the frontal sides of the vehicle for maximum coverage in case of an unexpected accident.

The resolution from the 1.3 megapixel [CMOS] imager is capable to clearly identify the number plate of another motor vehicle in front up to a full car length along with all general road signs ahead.

The in-built GPS module stores the location and all relevant GPS co-ordinates along with speed and direction, simultaneously combining the collected data, video, audio and G-force into segmented files on a compact SD card.

Characteristics Of The X-DRIVEN Driving Recording System

- Clear (wide angle) images, accurate data
- Clear (static & background free noise) from audio microphone
- Clever state of the art (compact low current) technology
- Internal GPS module (automatically loads up to Google Maps)
- Supplied with 2GB SD memory card type (option up to 16GBHC)
- No tools required quick & simple installation (cigarette lighter power adaptor included)
- Meets all legislative safety equipment approvals (CE, RoHS, FC, MIC etc.)
- Optional suction cup glass mount cradle

X-DRIVEN is recommended and ideal for:

- **Regular drivers** of any motor vehicle from compact hatchbacks to sedans, wagons, 4WD's and light commercial vehicles
- **Professional drivers** of taxi's, hire vehicles/car rentals, fleet operators, buses/passenger transport, trucks, general freight/cargo transport and semi-trailers
- **Government departments** such as police, fire brigade, ambulance, emergency vehicles and council vehicles
- **Driving schools** to monitor driving behaviour and potentially decrease liabilities

The X-DRIVEN Driving Recording System Kit consists of the following:

- Driving Recording System Unit
- 2GB SD-Card (Embedded with X-Driven Program)
- Adhesive Windscreen Camera Mount Bracket (Suction Cup Optional)
- Cigarette Lighter Power Cable Adapter (12 or 24V DC)
- Adhesive Cable Holders (x6)
- Instruction User Manual

Key Features at a Glance

Maximum Storage Capacity available on SDHC 16GB

The X-DRIVEN Driving Recording System Kit is supplied as standard with a 2GB SD Card that can be changed to a larger capacity card; (SanDisk & Toshiba SD-Cards recommended). Extended hours of driving can be fully recorded and stored on the X-DRIVEN's SDHC Card (up to 16GB). When the SD card reaches its maximum capacity it will automatically overwrite the oldest saved file to allow storage of new files.

1.3 Megapixel Image Sensor for Clear High Resolution Recording

With a higher resolution 1.3 megapixel image sensor, X-DRIVEN can offer higher quality video images across a wider angle 120° horizontal lens to maximise the video footage and help identify the cause of Incidents or accidents.

GPS - Integrated GPS Module for Speed and Location Information

The in-built GPS module stores the location and all relevant GPS co-ordinates along with speed and direction that automatically loads up to Google Maps when reviewing the stored data files. (Note: PC has to be connected to the internet to activate Google Maps).

Audio Recording

Clear static and background free noise from integrated audio microphone. Audio can be switched ON/OFF via programmable setting. All audio files are synchronised to the video and stored simultaneously with corresponding data files.

Reverse (Upside Down) Recording Function

The Driving Recording System can be reversed upside down without compromising the image as the internal movement sensor will automatically revert the image to the correct viewing aspect.

X-DRIVEN - User Friendly Installation Program & Operation

The Driving Recording System is complimented by a fully functional X-DRIVEN user friendly program allowing quick interaction and operation across all parameters with a simple to use information loaded menu accessible by a few short "clicks" of your mouse.
